

Make Steam Shortcut

- 1) Select "Steam shortcut" from the first drop down menu
- 2) Select the emulator you're planning to use
 - 2-b) If the emulator can't be found by SLEET it'll ask you to point to where it is, do so and click "save"
- 3) Select your rom using either the browse button or by typing it in.
- 4) Type in the name you want the Steam shortcut to have
- 5) Click the "Make Steam shortcut" button
- 6) Make sure the address to your Steam install is correct
- 7) Press "Detect Users"
- 8) Select the user you want to add the shortcut for
- 9) Click the "Submit" button

Make Windows executable

- 1) Select "Windows Executable" from the first drop down menu
- 2) Select the emulator you're planning to use
 - 2-b) If the emulator can't be found by SLEET it'll ask you to point to where it is, do so and click "save"
- 3) Select your rom using either the browse button or by typing it in.
- 4) Type in the name you want the Windows Executable to have
- 5) Click the "Make Windows Executable" button
- 6) Choose where you want the Windows executable to be made
- 7) Optionally, choose an icon for it (If you don't, it'll be the SLEET icon by default)
- 8) Click the "Submit" button

Edit your user preferences

- 1) Click "Menu"
- 2) Click "User Preferences"

3) Fill in any information you want to change

4) Click the "Save Preferences" button

Add support for an emulator

1) Click "Menu"

2) Click "Add emulator support"

3) Name the emulator

4) Give it a path

5) Fill in the command line information as needed

6) Review the preview of how the command will appear and adjust accordingly if necessary

7) Click the "Save new emulator support .ini" button

Import an emulator .ini to provide support for an emulator

1) Click "Menu"

2) Click "Import emulator .ini"

3) Type in or browse to locate the .ini

4) Click the "Import" button

NOTE: This will copy the .ini you provide, meaning that you can delete that .ini if you want after importing and it won't affect SLEET

Edit the support .ini file for an emulator

1) Click the "Edit Emulator .ini" button

2) Edit whatever details need to be edited

3) Check the command preview to ensure that your edits appear as you need

4) Click the "Update emulator support .ini" button

Report a bug

1) Click "Help"

2) Click "Report a bug"
